IMPORTANT: Our Model WPO50 Trough Drinker must have a neck rail installed over it. No neck rail in place will void the warranty.

To install the valve cover, depress Ref. No. 5 stainless steel cover pin. Place cover into position. Let pin snap back out into the hole in the end of the trough. To remove valve cover, depress the cover pin through the hole in the end of the trough. Lift one side so that the pin snaps back outside of and above the trough. Use the handholds to help lift the cover.

To open access doors on the trough, use a straight blade screwdriver. Turn Ref. No. 11 fillister head bolt one quarter turn and the bolt should pop out.

Use the mechanical plug (Ref. Nos. 25) inside the trough.
